Every year during the last 10 days of January, communities across the country conduct comprehensive counts of the local homeless populations in order to measure the prevalence of homelessness in each local Continuum of Care.

The 2019 Southern Nevada Point-in-Time Count was a community-wide effort conducted on January 23, 2019. The entire county was canvassed by teams of volunteers. In the weeks following the street count, a survey was administered to persons experiencing unsheltered homelessness in order to profile their experience and characteristics.

**5,530**

Total number of persons experiencing homelessness

- **60%** Unsheltered
- **40%** Sheltered

**14,114**

will experience homelessness in our community at some point this year
